

# Checking Your Graduation Status

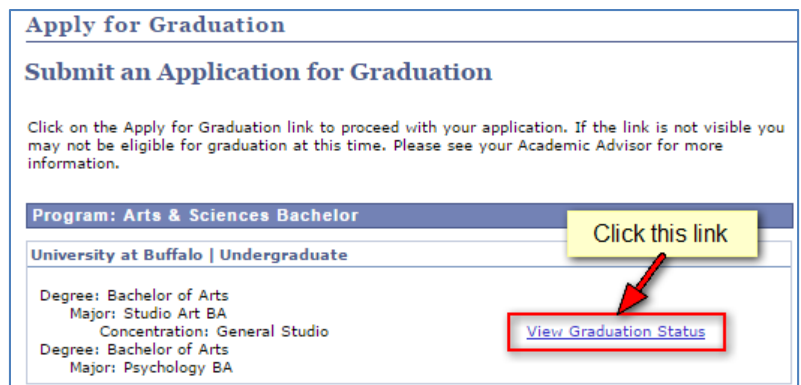

Should you want to check the status of your graduation application, you can perform the same initial steps as when you applied for graduation.

From your Student Center, click the drop down box under the Academic group header and select Apply for Graduation.

Then click the Go button.

You will then see a link “View Graduation Status” in the location that was once “Apply for Graduation”. Click that link.

Once you click the link, you’ll see the status of your application. We encourage you to check periodically on your status prior to graduation, so you know the status of your application. The Registrars Office and your department will be conducting a series of academic audits to ensure that you have satisfied all your degree requirements.

You have successfully reviewed the process for checking your graduation status.
